Schedule Your Appointment On-Line

Now you will find it easier and more convenient to schedule your next doctor’s appointment by using CareMount Medical's online scheduling portal. The online appointment system enables real-time patient self-scheduling by connecting into provider calendars from the CareMount Medical website. Patients can access the system 24/7 without having to call to make an appointment.

“Our online scheduling portal supports our commitment to provide the highest patient satisfaction and service,” said Scott D. Hayworth, M.D., President and CEO of CareMount Medical. “This new patient enabled solution will make it easier for CareMount patients to get in touch with their physicians and their offices.”
How Do I Schedule Online?

You can make an appointment from the convenience of home or from your smartphone without the need to make a phone call. Simply visit caremountmedical.com, and select the “Schedule Online” tab in the upper right corner of the homepage.

Who Can I Make an Appointment with Online?

Internal medicine and family practice providers are currently available through the portal. Online scheduling for pediatrics, OB/GYN and specialty physicians will be rolled out in phases throughout the course of the year. After scheduling your appointment online, you will receive an email notification confirming your selections.

Save Time! Check In At Home With Phreesia!

Did you know that CareMount Medical has an easy and secure check-in experience?

CareMount has partnered with Phreesia so that from your seat in the waiting room and with the easy-to-use Phreesia Pad, you can edit and update your information, pay copays and balances, and electronically sign forms and read policies.

Or you can make your check-in process even faster by using Phreesia Mobile on your home computer or mobile device. With Phreesia Mobile, a CareMount provider will send you a check-in link, delivered in an email. You can pre-register for your appointment conveniently on your own time.

With Phreesia, your records stay up-to-date and the information you enter is always private and secure. Patient data is always encrypted and protected, and is never stored on the Phreesia Pad. And when you make a payment on the Phreesia Pad or on the Phreesia Mobile platform, you can rest assured that your financial data is protected by the most stringent industry standards.

The secure information you enter into Phreesia is immediately available for your physician to review so you can make the most of your visit and have more meaningful conversations in the exam room.
Walk-In Services
No Appointment Necessary

As a CareMount patient, your medical records will be available at your physicians office.

Vaccinate Against Serious Childhood Illnesses

Pneumococcal diseases are contagious; they spread through respiratory fluids, like saliva or mucus. The label “pneumococcal” most often brings to mind pneumonia, which certainly is one serious illness addressed by the PCV13 vaccine. In addition, the vaccine offers protection from pneumococcal bacteria that cause other illnesses, some of which are also life threatening. Read more from Dr. Amin Patil.

5 Ways Stress Affects the Heart
To minimize heart hazards related to stress, it's key to tackle the stress itself and any unhealthy habits stemming from it. In addition to eating properly, exercising, and avoiding smoking and excess drinking, stress-busting tactics include meditating and regularly unplugging from digital devices. What ways does stress affect your heart?
