Healthcare That Revolves Around You.®

caremountmedical.com

The Radiology department combines superior clinical expertise in a 100% digital imaging environment to bring our patients an extraordinary level of care.

All services include state-of-the-art digital imaging equipment that allows immediate viewing access on PACS (Picture Archive and Communication System) to all our radiologists in the CareMount Network.

CareMount excels in having the finest interpretative team available across all modalities. The team includes board-certified radiologists with subspecialty expertise in body imaging, neuroradiology, musculoskeletal and women's imaging. Your image receives a highly skilled and experienced approach from initial acquisition to diagnosis.

Radiologic Services

- 3D Mammography
- MRI*
- PET Scan
- CAT Scan
- Ultrasound
- X-Ray
- Bone Density
- Fluoroscopy
- 4D Prenatal Ultrasound
- Vascular Ultrasound

* MRI with wide bore/sedation available

Scheduling:

For your convenience, CareMount Medical provides a dedicated scheduling phone number, where patients can schedule any imaging appointment for any location. Patients also have the option to schedule an appointment at any one of our Radiology front desks. Call **888-656-4723** to schedule your appointment.

Timely Results

It is important that patient concerns be addressed at the time of service, and this level of care is standard practice at all CareMount locations.

Comprehensive Excellence in Breast Imaging

CareMount's Breast Imaging service includes 3D Tomosynthesis mammography at most CareMount locations. Breast MRI and associated biopsy services include ultrasound guided vacuum-assisted, and 3D Stereotactic guidance as well.

For Your Comfort

We offer MRI sedation service at both our Mount Kisco and Poughkeepsie locations for patients with anxiety, claustrophobia, or those who are unable to remain still for an extended period of time. In addition, we offer wide bore MRI machines to accommodate patients who may be claustrophobic, have wide shoulders or who may not fit into a traditional MRI enclosure. This new technology provides an option for higher quality imaging with better diagnostic ability than an open MRI.
