

MEDICATION RESOURCES

Patient Cost-Saving Guide

At CareMount Medical, our primary focus is delivering high-quality care that improves our patient's experience and health. Since exceptional care is our objective, we understand prescribed treatments may not always be covered by your specific insurance plan.

We do our best to provide alternatives when applicable and available. We encourage you to work with your insurance company to verify coverage in order to avoid any unexpected costs. Most plans provide a **formulary** (preferred drug list), and can advise of lower cost alternatives if the specific drug you are prescribed is not covered. **Always speak with your doctor first to confirm if the alternative may be appropriate for your care and condition.**

With prescription drugs costs continuing to rise, we wanted to provide you with a resource to take advantage of certain cost saving programs that are available to help offset any medication costs. Please see the list below for a quick reference guide to possible cost saving resources.

Healthcare That Revolves Around You.®
