

2021 CAREMOUNT MEDICAL SKILLED NURSING FACILITY (SNF) PREFERRED PROVIDER NETWORK

At CareMount Medical (CMM), we understand that managing your healthcare can sometimes feel overwhelming or seem complicated. **We are here to support you.** We take pride in our community-based preferred provider network, which promotes care coordination and collaboration to provide high quality, efficient, and fiscally responsible care.

What is CMM's Skilled Nursing Facility Preferred Provider Network?

CMM's Skilled Nursing Facility Preferred Provider Network is a select group of Skilled Nursing Facilities that are required to meet and maintain the highest quality standards while providing cost-effective care. These SNFs specialize in providing high quality and coordinated care and are conveniently located within the communities we serve.

We work closely with our SNF partners to monitor your progress and communicate with your care team. Our Discharge Coordinator will work with you and your family to provide support; address questions regarding discharge plans; help facilitate the right resources upon discharge; and set up timely follow-up visits with your primary care doctor or specialist to ensure your care is properly coordinated.

We understand and respect the importance of patient choice.

You have the freedom to select your own healthcare provider. We thank you for considering the benefits of choosing a Preferred Skilled Nursing Facility for your healthcare needs.

What are the benefits of CMM's Skilled Nursing Facility Preferred Provider Network?

The benefits of selecting a Preferred Skilled Nursing Facility include:

Seamless Care: We work hard to ensure you receive highly coordinated care and transition planning – from hospital to SNF and from SNF to home.

Additional Clinical Support: A CMM Discharge Coordinator will monitor your care during your stay at a Preferred Skilled Nursing Facility.

Timely Information: Streamlined ongoing communication between you, your providers, and your family will help you make decisions through each stage of care.

Important Follow-Up Care: We will coordinate an important follow-up visit with your primary care doctor or specialist after you are discharged from the SNF; this will help to reduce the likelihood of complications and avoid unnecessary hospital or ER visits.

Financial Stewardship: We are committed to providing the highest quality, most cost-effective care to our patients.
